

The Computer Conservation Society 2016-17 Donations

There is no fixed subscription to the Computer Conservations Society (CCS). The costs of running the Society, including committee and meeting expenses, are covered from an annual allocation by our parent body the BCS*. In lieu, the CCS Committee invites members to donate a small sum each year to the CCS Donations Fund which enables the provision of occasional support for restoration projects and working groups.

CCS members are invited to make small annual voluntary donations of £15 or more. These donations are wholly independent of other costs and are placed in a separate account. By their nature restoration projects sometimes need additional, relatively small sums to meet an unforeseen, sometimes urgent need.

In this way, the Society is able to assist those doing voluntary restoration work. For example, a few years ago, the CCS was able to rescue an ICT 1301 from a barn in Kent. More recently we enabled the HEC 1 to be transported from the Birmingham Science Museum to the National Museum of Computing at Bletchley Park. In many such cases, machines with considerable historical value can be saved from being left to deteriorate.

Donations may now be made on-line by credit/debit card at <http://computerconservationsociety.org/donate.htm>. Alternatively, please complete the form below and send it with a cheque to the CCS Treasurer.

On behalf of the Committee, may I thank all those able to support your Society in this very tangible way.

Chair, Computer Conservation Society
January 2017

* Registered charity: No 292786 (BCS), formerly The British Computer Society.

Dr David Hartley (CCS Treasurer)
22 Applecourt, Newton Road, Cambridge, CB2 8AN

2016-17

I enclose a voluntary donation to the CCS Donation Fund (cheque payable to "**British Computer Society***") for £_____
