# ANSA Road Map

What we propose to do in the next 12 months

14 Oct 97

Richard Hayton

APM.2079

### Three Areas

#### **FollowMe**

•Personal Information Space

•Extensible Mobile
Object Platform

# Declarative Binding

### Specification of binding requirements

- security, auditing, access control, performance...
- automatic binding to meet requirements

#### Continue current FlexiNet work

- negotiation by refinement
- late negotiation and binding

Design Language & Build Prototype Binder

#### Declarative Transactions

#### High Transparency Concurrency

- focus on middle-tier (business logic)
- declarative specification of concurrency semantics

#### Design & Build Prototype System

# Extensible Mobile Object Platform

Basic infrastructure for agent development

#### Kafka over FlexiNet

- FlexiNet provides communications infrastructure and reflection
- Kafka provides agent mobility
   Produce and Extend Mobile Distributed Object Platform

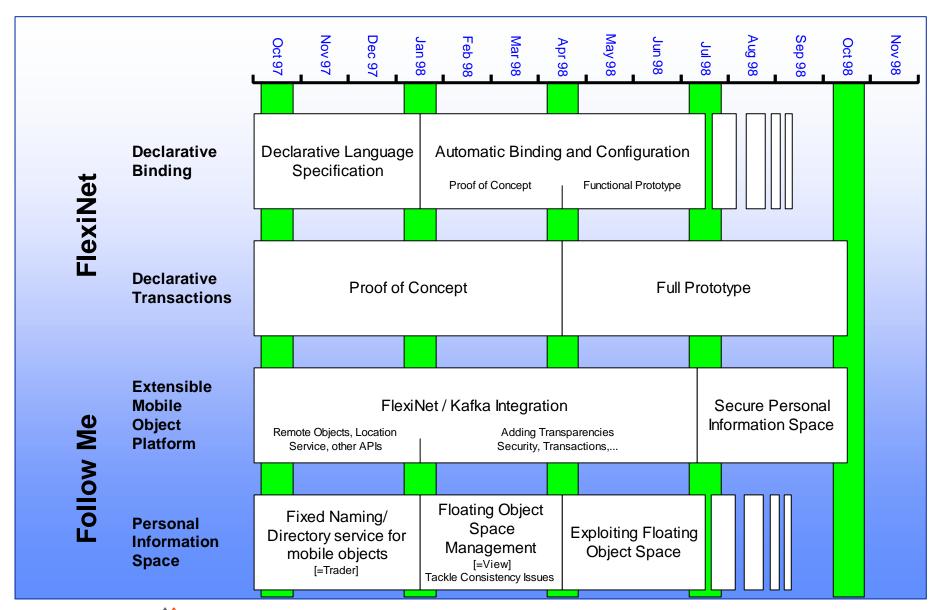

# Personal Information Space

Manage information that follows its owner

Develop "floating object spaces"

Produce Fixed Object Space and
Extend to Floating Object Space

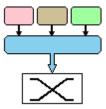

### In Addition

Access to deliverables from

DCAN
